

## ***From The Shed***

### **Major Projects Update as at 18<sup>th</sup> March 2013**

#### ***11<sup>th</sup> Green***

Work at the 11<sup>th</sup> green is not yet complete. We will be installing a large stormwater drain across the approach lower than the existing one to drop the height of the pond in front of the 11<sup>th</sup> green.

Also fill will be added to the hole on the left hand side near the fence line to increase the approach area and give buggies a track on the left hand side away from the 11<sup>th</sup> green.

Hopefully this will improve the compaction issues in this area.

#### ***9<sup>th</sup> Dam***

The capacity of the dam on the 9<sup>th</sup> will be further increased by concreting the bottom causeway, this will bring the height of the dam up another foot or two, this means the grass bunker at the 10<sup>th</sup> green will likely be under water so the height of this will also be raised and returfed.

Also a pipe has now been installed between the two dams so we can send water from the top dam to the bottom dam at anytime.

**Affordable golf in a friendly, relaxed hinterland village setting**

### ***Concrete Pathways***

Path upgrades and improvements will be ongoing over the next few weeks with the 18<sup>th</sup> and 1<sup>st</sup> being the most likely first holes to be targeted.

### ***Safety Screens***

The screen at the 3<sup>rd</sup> tee will be moved to the 16<sup>th</sup> tee in the next few weeks for better safety.
